

## The Buzz Is Building: European Home's Vision Gas Fireplace Wins Building Products Top 100 Award!

---

Saugus, MA – March 25, 2008: “Sleek”, “modern”, “elegant”, and “innovative” are just a few of the words used to describe European Home's gas fireplaces. Now you can add “Award Winning” to the list. Hanley Wood, the publishers of *Building Products*, *Custom Home*, and *Residential Architect* magazines has named the *Vision Gas Fireplace* one of the Top 100 Building Products of 2007.

Now in its 10<sup>th</sup> year, the BP Top 100 recognizes the 100 products that generated the most buzz among readers in 2007. The significance of this award isn't lost on owner Holly Markham, “We really try to make products that are on the cutting edge of function and design,” she says. “To have those efforts validated by the designers and builders that use them is just a great, great honor.”

This prestigious award follows a move to a larger facility, and comes right on the heels of the introduction of the *West End Wall Fire*, European Home's latest addition to its line of contemporary gas fireplace products.
