

Outdoor Fireplaces & Grills

Create Beyond Convention

focus®

A LITTLE HISTORY

From a simple sketch by creative genius and founder Dominique Imbert, Focus brand fireplaces took form in Southern France in 1968. For over 50 years, Focus has been forging a perfect balance between creativity and demanding technical standards. Using methods such as metal turning and invisible welded seams, they ensure high quality and a clean finish. Today, the iconic Focus fireplaces continue to grow in popularity with lovers of fire and design around the world.

GYROFOCUS - WOOD

This seminal design, created by Dominique Imbert in 1968, was the first suspended, 360 degrees pivoting fireplace. It is revolutionary for its technical design and groundbreaking style.

PAXFOCUS - WOOD

The wall version of the floating Ergofocus, the classy and space-saving design of the Paxfocus outdoor fireplace is a perfect fit for any patio. The wood-burning, naturally vented hearth allows warmth to be radiated throughout your outdoor space. With its clean lines this fireplace adds a truly unique conversation piece to your outdoor design.

ERGOFOCUS - WOOD

This suspended and rotating version of the Paxfocus is a stunning option. Its pure, elegant shape is not only perfectly proportioned, but maximizes heat efficiency. The blend of function and form makes the Ergofocus one of the most popular of Focus' suspended outdoor models.

ÉMIFOCUS - WOOD

As a wall version of the Bathyscafocus, his model's elegant yet discreet form, heat efficiency and easy installation combine to create an intimate and warm atmosphere in a range of different settings, from mountain ski chalets to suburban back yards.

BATHYSCAFOCUS - WOOD

With a nod towards the sea, this round, compact fireplace has a serene, understated and warm presence. This floating version of the Émifocus rotates 360 degrees so the fire can be turned to create drama and ambiance in all directions.

DOMOFOCUS - WOOD

The Domofocus' smaller size boasts a larger hearth opening, 9 ¼ inches high to the Gyrofocus' 8 inches, for a better view of the hypnotic allure of a wood burning fire.

The shape and versatility of this contemporary fireplace not only makes it an efficient source of heat but also a showpiece and work of art.

Focus Fireplace Finishes Available

Anti-Corrosion Black Paint

Hematite Rust

BUBBLE - FIRE BOWL

The Bubble is a contemporary wood-burning fire bowl that brings its stylish originality to any outdoor space. Its open fire provides the perfect centerpiece to extend long summer nights or take the chill off autumn evenings. The brazier's simplicity and sophistication, a hallmark of Focus design, as well as its performance make it suitable for a wide range of exterior settings, from gardens to roof terraces to patios.

SIGMAFOCUS - WALL BARBECUE

This steel wall barbecue folds up, so that when closed it takes up limited space. Attractive in both open and closed positions, the Sigmafocus offers a range of cooking heights. It is easy to attach to any wall (there are only two fixation points).

The generous ash pan allows the barbecue to be used a number of times without having to empty it out. The mounting disc protects the wall from smoke.

FOLDS UP WHEN NOT IN USE

OPTIONAL COVER

DIAGOFOCUS - OUTDOOR GRILL

Introducing the multi-talented Diagofocus - thanks to its wheels, it can turn its back to the wind, or be guided to the ideal location to avoid the eccentricities of the winds and the seasons.

This attractive barbecue is also generous in protecting hosts and guests from smoke, as well as guarding from the flames to provide an optimum grilling experience.
