

FIRE IT UP

**KEEP THE COLD AT BAY
WITH NEW FIRE AND
HEAT ELEMENTS.**

BY EMILY DAVIDSON

OCEAN MASTER MAX HEATING SYSTEM

With this system, outdoor spaces can have shade *and* heat. Adjustable infrared heaters attach to the underside of TUUCI's Ocean Master Max parasol collection. Electrical lines are concealed inside the mast of the umbrella, and the heaters can be turned on and off with a remote. If the heaters are not turned off, they will automatically power down when the parasol frame is closed. ●

COURTESY TUUCI

SIGMAFOCUS

Save space with the wall-mounted Sigmafocus barbecue. This wood-fired steel grill includes a back panel to protect walls from smoke damage and a generous ash pan that folds vertically when not in use. A tiered grill rack offers several cooking heights inside. ●

SQUARE PEAK SMOKELESS PATIO FIRE PIT

The double-walled frame of this steel fire pit is designed to eliminate smoke and sparks by fanning the flames with a steady flow of air through vents at the top of the burn chamber. The Square Peak Smokeless Patio Fire Pit burns wood and wood pellets. After use, a removable ash catch makes cleaning up simple. ●

FIRE RING

With handhold cutouts on either side, this simple fire pit can be easily moved as needed. The frame consists of 1/8-inch-thick unfinished steel and will develop a warm patina over time. Paired with a recycled HDPE Fire Ring Top, it also doubles as a cocktail table. ●
