

Is my Evonic Fireplace Bluetooth or Wifi enabled?

****Please make sure your fireplace is plugged in and the on/off switch is on. (Pictured below)**

To determine Bluetooth:

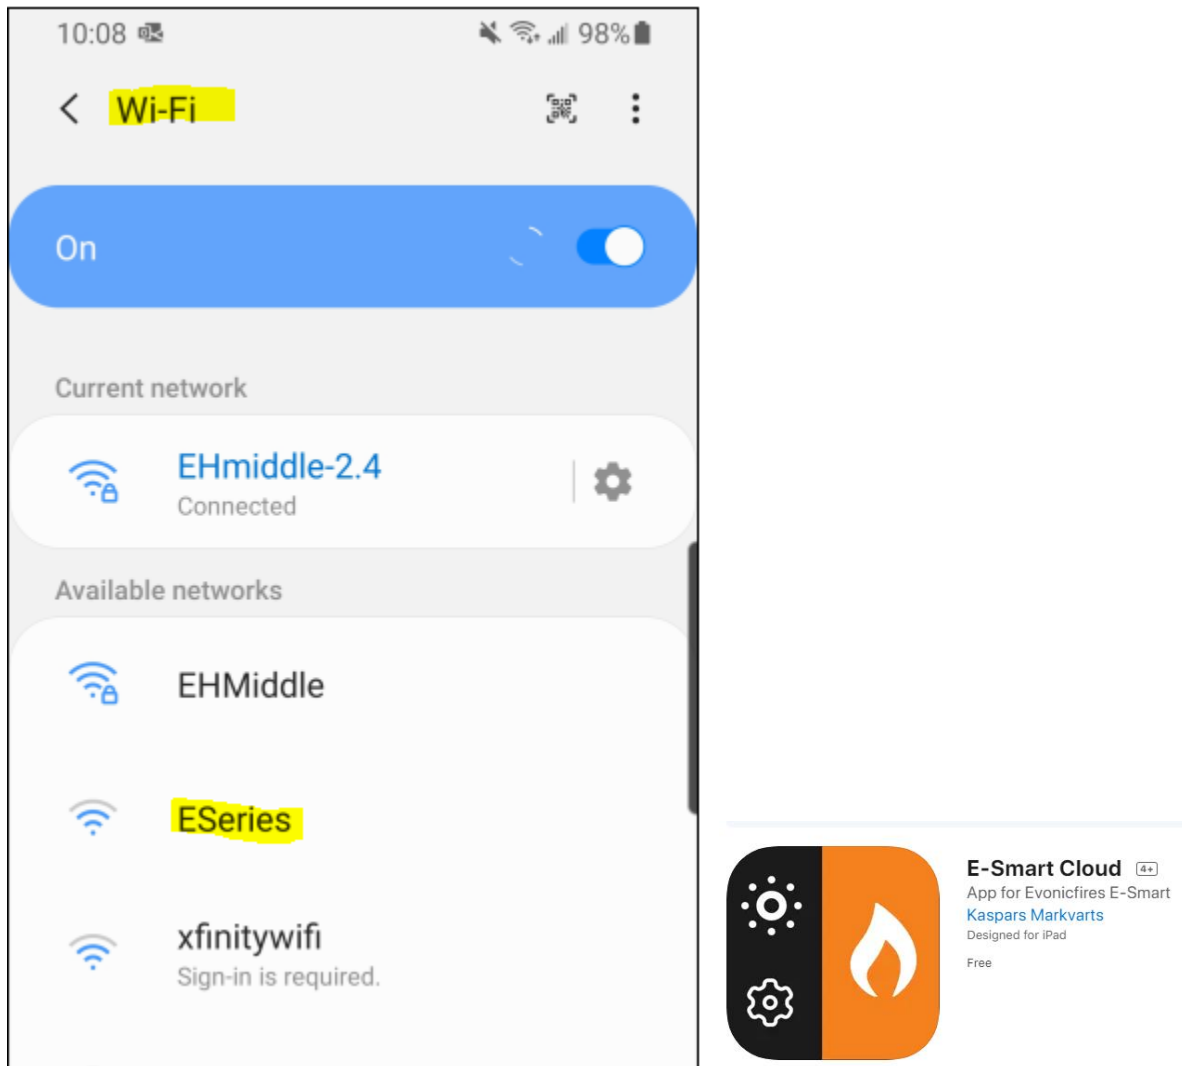

Go to your Bluetooth list on your device and see if you can locate your fireplace on the list (example below) Make sure you are in front of the unit within 3 feet.

Once your fireplace is selected, you can download the e_touch app (shown above) and follow pairing instructions on pages 44-45 on the installation manual.

To determine Wifi

Go to your wifi list on your device and see if you can locate your fireplace on the list (example below)

Once your fireplace is selected, you can download the E-Smart Cloud app (shown above) and follow pairing instructions on pages 22-23 on the installation manual.

If there are any issues on the above information, please contact your local dealer who installed the fireplace for further troubleshooting.
